About Us:
Pro B Products is a Bengaluru based company engaged in manufacturing a wide range of Coconut processing machines for domestic & export market.

Product range:
• COCONUT DEHUSKING MACHINE
• COCONUT DESHELLING MACHINE
• COCONUT TESTA REMOVING MACHINE
• COCONUT PRE CUTTER
• COCONUT PULVERIZING MACHINE
• COCONUT MILK EXTRACTOR
• VIRGIN COCONUT OIL COOKER
• HYDRAULIC / MANUAL PRESS
• COCONUT CHIPS (SLICER) MACHINE
• HOT AIR DRYER
• TENDER COCONUT TRIMMING MACHINE
• NEERA (COCONUT SAP) PROCESSING MACHINES
• PIN MILL
• DESICCATED COCONUT POWDER DRYERS
• LUMPS BREAKER
• CONVEYOR SYSTEMS

Applications:
• Virgin Coconut Oil Processing Units
• Coconut Chips Processing Units
• Desiccated Coconut Powder Processing Units
• Tender Coconut Minimal Processing Units
• Hotels, Bakeries, Temples and other Coconut Processing Units.

Features:
• Easy to operate
• Cost effectiveness
• Reliable quality
• Low maintenance
• Easy installation
• Effective utilization of consumables
• Compactness
• Service after Sales
**COCONUT DEHUSKING MACHINE**

Coconut dehusking machine removes husk from raw coconuts. This machine is useful for Coconut estates, Co operatives Societies, coconut growers and coconut processing industries and temples. This machine is available in different models.

- **Power:** 2Hp To 7.5Hp
- **Productivity:** 250 To 1500 Nuts/Hour

**COCONUT DESHELLING MACHINE**

We offer wide range of Coconut Deshelling Machines for Coconut Processing Industries. These machines are removes hard coconut shell from dehusked coconuts. These machines are developed to accommodate all types of coconut.

- **Power:** 1Hp
- **Productivity:** 250 – 300 Nuts / Hour

**COCONUT TESTA REMOVING MACHINE:**

This Machine has been developed to remove testa from coconut endosperm (kernel). Testa removing is an important operation during the process of making many high value coconut products like desiccated coconut, virgin coconut oil etc. Coconut kernel is pressed to the surface of the rotating friction wheels by hand.

- **Power:** 1.5Hp
- **Productivity:** 150 – 300 Nuts / Hour

**COCOCUT PRE CUTTER:**
This Machine has been developed for slicing ball coconut in to 8-10 pieces. Slicing (Cutting) will be done after deshelling OR Testa removal operation. Slicing will takes place by just dropping coconut ball in to the hopper. These pieces further can be used as input for Pulveriser, Frozen coconut pieces etc.,

Power: 1 HP to 3HP  
Productivity : 300 to 1000 Nuts / Hour

**COCONUT PULVERIZING MACHINE:**
This Machine has been developed for Grating / Pulverizing coconut in to small particles. All contact parts are made with food grade stainless steel with high rigidity. Pulverizing will be done by just dropping coconut pieces to the hopper provided at the top of the machine. This machine also useful for slicing vegetables, like carrot, cabbage, radish, beetroot etc.,

Power : 1.5 HP to 5 HP  
Productivity : 200 – 800 Nuts / Hour

**COCONUT MILK EXTRACTOR (EXPELLER):**
The Coconut Milk Expeller extracts milk from Coconut Kernel. Coconut milk will be extracted from double screw barrels which give high efficiency. Provision will be made for collecting Milk and residual separately. The machine would be of great help to all processing units involved in coconut milk extraction.

Power : 0.5 HP to 5 HP  
Productivity : 200 – 800 Nuts / Hour
VCO COOKER:
This equipment is designed for processing Virgin Coconut oil, Neera sugar, Squash. The mode of heating is by thermal fluid. Shelf life will be increasing by removing moisture content.

- Power: 0.5 - 2 HP
- Tank Capacity: 50-300 Ltrs
- Fuel: LPG / Electrical
- Heating Media: Through Industrial Oil

CENTRIFUGE:
Tubular High Speed Centrifuge is the most vital equipment in Virgin Coconut Oil Separation (by Wet Milling Centrifuge method). We have excellent experience in Separation Technology various Virgin Coconut oil processing industries.

- Power: 4 HP
- Capacity: 3000 Nuts / Shift

HYDRAULIC / MANUAL PRESS
These Equipments of used for extracting virgin coconut oil from scrapped roasted coconuts. Equipments are available with hydraulic & manual type versions.

- Type: Manual / Automatic
- Productivity: 15 – 50 Nuts / Hour

**COCONUT SLICING (CHIPS) MACHINE - ELECTRICAL:**

In line with our various coconut processing machines, we also manufacture Coconut slicer (Chips). Using this machine various thickness Chips can be manufactured. These chips are used as ready to eat snack.

- **Power:** 0.5 HP to 1 HP
- **Productivity:** 75 to 150 Nuts / Hr

**HOT AIR DRYER (ELECTRICAL):**

Hot air dryer is used for drying as well as baking of the raw material. The raw material kept in the tray is heated by the hot air, generated when air is passed through heated coil and circulated by fan.

- **Power:** 5 HP to 40 HP
- **Productivity:** 10 to 200Kg / Shift

**TENDER COCONUT TRIMMING MACHINE WITH BASE CUTTING:**

This equipment converts the young coconut into diamond shape. After reducing size & shape. Tender coconut will be ready to serve like a soft drink bottle. It can be used at office, hospitals and hotels.

- **Power:** 1HP
- **Productivity:** 80 – 100 Nuts / Hour

Desiccated Coconut Powder Processing Machines

We offer wide range of Desiccated coconut manufacturing units. Our units are designed to ensure quality output accepted globally.

Productivity range 5000 - 100000 Nuts / shift
